

Jacobsens Bakery A/S

Original Danish Cookies

Made in Denmark

Company Profile

Jacobsens Bakery (former Intergoods Bakery Ltd.) was established in 1962 by Mr. Sigurd Jacobsen—originally as an import/export company.

In 1967

The company commenced export and marketing of traditional Danish Butter Cookies in tins under its own brand using domestic manufacturers to co-pack the products.

In 1984

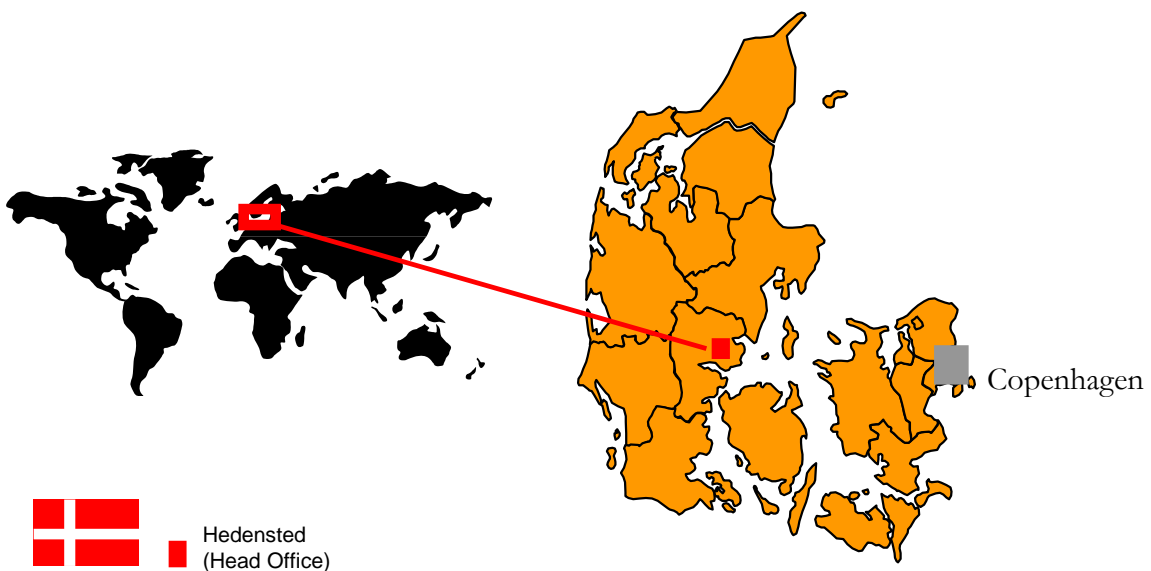

The business has grown to a substantial level and the decision was made to establish own manufacturing facility. A state-of-the-art, fully automated baking and packing line was installed. During the following years investments in the latest technology have constantly been implemented in order to increase capacity, to secure a high and consistent quality level, flexibility and just in time delivery.

In 2001

In January 2001 the company changed its name from Intergoods Bakery Ltd. to Jacobsens Bakery Ltd as a part of a new product and branding strategy. Today Jacobsens Bakery Ltd. is the preferred supplier by major retailers all over the world of Danish quality cookies packed in an extensive range of traditional tins, added value tins and other pack types—a position, which has been reached through detailed knowledge about the constant changes in the market and in consumer demands and consequently constant innovation within products and designs.

Ownership

Jacobsens Bakery Ltd. Is owned 100% by the Jacobsens family. In October 2003 Dun & Bradstreet again awarded Jacobsens Bakery Ltd the highest possible financial rating—“AAA”.

Company Profile

885,000 tins capacity per week

If the yearly production of tins were stacked on top of each other, this would equal the height of 9,971 Eiffel towers.

2,500,000 paper cups used per 24 hours

The yearly consumption of paper cups in our production would equal approx. 680,000 news papers (New York Times).

83 kilometers of sealing tape used per 24 hours

If our yearly consumption of sealing tape was stretched into one long line it would reach (26,280 km).

33,800 kilos of flour used per 24 hours

The yearly flour consumption in our production would equal the total weight of 61 Statues of Liberty.

14,350 kilos of butter used per 24 hours

The yearly butter consumption at the factory equals the weight of approx. 4,580 passenger cars.

7,585,000 Cookies Produced per 24 hours

If the yearly production of cookies were placed in line next to each other they would reach (133,269 km).

14,250 kilos of sugar used per 24 hours

The yearly sugar consumption in our production would equal the total weight of 1490 elephants.
